Description of the vulnerability	Operating systems/versions affected	Risks of attempting to exploit	Risk	Remediation action	CVSS score	
Unpatched RDP is exposed to the internet	Windows/Linux	Time consuming /consistly changing IP address	If code is excuted properly attacker could inject BlueKeep /wormable exploit	configure firewall so no traffic can come though except traffic from allow- listed ip address ranges for authorized personnel / invest in more cloud services to remediate this issue from currenting the future	7.5	
	Atremis web application	being locked out by system	loss of sensitve data,lost of application control ,delete data or destroy backups .disvastating loss to company	Use prepared statements with paramenterized queries/use of properly constructed stored procesures /allow-list		
Web application is vulnerable to SQL Injection	/Redhat/Windows	/block by firewall /IP banned	applications	input validation	9.8	
Default password on Cisco admin portal	Cisco IOS	Host ban/IP banned /locked out /network outage	Loss of control of network/Traffic interference /Lost of sensitve data / loss of availabitty and confidentiality	adhere to password work policy/best pratices , standards and controls	8	
Apache web server vulnerable to CVE-2019-0211	Linux/Red Hat /HTTP Server 2.4. 17 - 2.4.	None vulnerability found in apache	lost of customer data,PII,PHI,lost of availablity, confidential,Integrity, massive system breach /possbile DoD	Upgrade to the lastest Apache HTTP version	7.5	
				Disable caching and autocomplete/store stronger passwords, proper data encryption/updated protocols apply access controls data		
Web server is exposing sensitive data	Windows/RedHat	Blocked by IPS/IDS	Loss of data and confidentialty	classificaton	9.8	
Web application has broken access control	Windows/LinuxRedHat	IPS/IDS interference /firewall block/NAC	Priviledge escalation/lose control of web app/availability loss	Routinely check access controls and consistently apply best pratices	8.8	
Oracle WebLogic Server vulnerable to CVE-2020-14882	RedHat/Windows	detected by IPS/IDS	Take over of Oracle WebLogic Server impacts Confidentialty,Integrity and Availbility	Patch mangement /install new patch	9.7	
Misconfigured cloud storage (AWS security group misconfiguration, lack of access restrictions)	Window/RedHatLinux	Loss of network functions/IPS/IDS Detection	Loss of Sensitive data ,Privilage escalation,impacts Confidentiality ,Integrity,Availbilitity	adhere to best pratices , automate policies on IAM/,audits regularly	9.5	
Microsoft Exchange Server vulnerable to CVE-2021-26855	Windows	IPS/IDS Detection /blocked ip	Loss of data via email ,phone,text ,IM,partial impact to Confidentiality ,Integrity ,Avaibility	patch management /Mircosoft Defender automaticly mitigates CVE 2021-26855	8.6
